CAMPBELL SCIENTIFIC®

WHEN MEASUREMENTS MATTER

26 February 2010

EMPLOYMENT OPPORTUNITY ANNOUNCEMENT

Application Engineer

JOB DESCRIPTION

JOB CLASSIFICATION: Application Engineer
DEPARTMENT: Marketing
GROUP: Environmental
REPORTS TO: Marketing Manager, Environmental Group

GENERAL FUNCTION: Responsible for technical support and marketing efforts, as supervised by respective market manager, directed toward environmental-related customers, especially those with systems related to meteorology. This involves educating customers in the use of Campbell Scientific dataloggers and peripherals for related applications, and assisting them, when necessary, in locating and fixing problems related to Campbell Scientific products. It also requires maintaining or obtaining familiarity with respective markets, recognizing the needs of customers within these markets, and proposing changes or the development of products to maintain or improve Campbell Scientific's competitiveness.

KNOWLEDGE & SKILL: Position requires, at a minimum, a BS degree in meteorology or significant experience in a meteorology-related field, and general knowledge of electronics and the application of physics to solve measurement problems. Personality characteristics should include natural curiosity, self motivation, service-oriented mentality, and a willingness to learn. Verbal and written communication skills are essential for understanding customer needs, conveying solutions to resolve problems, and working with other Campbell Scientific employees. Must have, at a minimum, a general understanding of computers and literacy with email, word processing, spread sheets, and Internet applications within Windows Operating systems. Experience with Campbell Scientific equipment is beneficial but not essential.

DUTIES & RESPONSIBILITIES: On a regular basis, provide to customers: price quotes, system engineering, product recommendations, education and training, and technical support. Coordinate with other meteorologists AND application engineers within Campbell Scientific related to product development, marketing, and sales efforts in meteorology-related markets.

On an occasional basis, as coordinated with market manager, perform system installations, field repairs, field experiments, sensor evaluations, product development, project management, QC activities, sales calls, product demonstrations, product tests, documentation for proposals, technical documentation for products and product literature and advertisements, and training of marketing personnel. Represent CSI at exhibits and professional meetings and participate on boards and committees as approved. Perform other tasks and responsibilities as assigned by manager.

This is a full time, salaried position with generous employee benefits, including paid medical and dental insurance and retirement programs. Only qualified applicants considered. If you are interested and meet the above qualifications, forward a cover letter, a current resume and a completed CSI Application for Employment (available at www.campbellsci.com) to Campbell Scientific, Inc., 815 West, 1800 North, Logan, UT 84321-1784. Campbell Scientific is an EEO/AA company.
