## EMPLOYMENT OPPORTUNITY ANNOUNCEMENT

### Application Engineer—Road Weather

#### JOB DESCRIPTION

**JOB CLASSIFICATION:** Application Engineer—Road Weather  
**DEPARTMENT:** Marketing  
**GROUP:** Environmental  
**REPORTS TO:** Marketing Manager, Environmental Group

**GENERAL FUNCTION:** Responsible for technical support and marketing efforts, as supervised by market manager, directed toward environment-related customers, especially those with systems related to road weather. This involves educating customers in the use of Campbell Scientific dataloggers and peripherals for related applications, assisting them, when necessary, in locating and fixing problems related to Campbell Scientific products. It also requires maintaining or obtaining familiarity with respective markets, recognizing the needs of customers within these markets, and proposing changes to or the development of products to maintain or improve Campbell Scientific's competitiveness.

**KNOWLEDGE & SKILL:** The ideal candidate would possess the following:

- Meteorology background, either through education or work experience
- Road-weather information systems (RWIS) knowledge and interest to work in this market
- Road-weather information systems installation experience
- Marketing skills obtained through education or work experience
- Experience using Campbell Scientific dataloggers

**DUTIES & RESPONSIBILITIES:** On a regular basis, provide to customers: price quotes, system engineering, product recommendations, education and training, and technical support. Coordinate with other application engineers and sales engineers within Campbell Scientific related to product development, marketing, and sales efforts in meteorology-related markets.

On an occasional basis, as coordinated with market manager, perform system installations, field repairs, field experiments, sensor evaluations, product development, project management, QC activities, sales calls, product demonstrations, product tests, documentation for proposals, technical documentation for products and product literature and advertisements, and training of marketing personnel. Represent Campbell Scientific at exhibits and professional meetings and participate on boards and committees as approved. Perform other tasks and responsibilities as assigned by manager.

This is a full time, salaried position with generous employee benefits, including paid medical and dental insurance and retirement programs. Only qualified applicants will be considered. If you are interested and meet the above qualifications, forward a cover letter, a current resume, and a completed Campbell Scientific application for employment (available at [www.campbellsci.com](http://www.campbellsci.com)) to Campbell Scientific, Inc., 815 West 1800 North, Logan, UT 84321-1784. Campbell Scientific is an EQUAL OPPORTUNITY EMPLOYER.
