Campbell Scientific, Inc., has an opening for a
Product Tester Intern

JOB DESCRIPTION

TITLE: Product Tester Intern
DEPARTMENT: Marketing
GROUP: Water Resources
REPORTS TO: Product Manager

REQUIREMENTS: College student working toward degree in environmental engineering, biological engineering, or chemistry science. Requires knowledge of procedures for testing water quality, along with background in instrumentation and measurement techniques used in water-quality testing processes. A successful candidate must be able to communicate clearly in English, both verbally and in writing, and have experience in quantitative data analysis, statistical data processing, and instrument calibration.

RESPONSIBILITIES AND DUTIES: Work in conjunction with product manager and engineering to test water-quality sensors and program dataloggers to perform needed functions. Organize data collected to provide reports of sensor performance. Programming required to integrate system components for complete system integration. Beta testing new sensors and systems during development stage.

This is a part-time, hourly position. Only qualified applicants considered. If you are interested and meet the above qualifications, forward a cover letter and a Campbell Scientific application for employment, available at www.campbellsci.com, to Campbell Scientific, Inc., 815 West 1800 North, Logan UT 84321-1784. Campbell Scientific is an EOE/AA company.
