0872N1

Campbell Scientific (Canada) Corp.
is pleased to present the new
Goodrich Sensor Systems

0872N1 Ice Detector

The 0872N1 Ice Detector is designed for severe ground-based icing applications and uses a probe heater and three strut heaters to ensure total de-icing.

Specifically for use on radio towers and meteorological sites, the 0872N1 uses 115 VAC 60 Hz input power, with maximum power consumption during de-icing at 180 watts.
