

Wind/Weather Meters

Portable Measurement Instruments

WeatherHawk wind and weather meters are portable, hand-held instruments that allow you to measure your weather conditions wherever you are. Useful for a variety of outdoor activities, these products feature a jackknife case and two-year warranty. Choose from seven models of varying capability and price.

WM-100 WindMate® Basic Windmeter:

- Measures wind speed
- Provides current and maximum wind speed
- Reports 5-second average, 10-second average, and 13-second average

WM-200 WindMate® with Wind Direction:

- Measures wind speed, wind direction, and temperature
- Displays current temperature, and current, maximum, and average wind speed
- Reports wind direction in both degrees and compass points
- Calculates head wind, tail wind, cross wind, and wind chill

WM-300 WindMate® with Wind Direction and Relative Humidity:

- Measures wind speed, wind direction, temperature, and relative humidity
- Displays current temperature, and current, maximum, and average wind speed
- Reports wind direction in both degrees and compass points
- Calculates head wind, tail wind, cross wind, wind chill, wet bulb, dew point, delta T, and comfort index (Accuweather.com patented)

WM-350 WindMate® Multifunction Weather Meter:

- Measures wind speed, wind direction, temperature, relative humidity, and barometric pressure
- Displays current temperature, and current, maximum, and average wind speed
- Reports wind direction in both degrees and compass points
- Calculates head wind, tail wind, cross wind, wind chill, wet bulb, dew point, delta T, comfort index (Accuweather.com patented), altitude and density altitude
- Displays a 48-hr history using a bar graph or numerical listing

WM-100 includes a wind vane to ensure accurate measurements on the wind's axis.

WM-200 has a wind vane and a USA-made fluxgate compass for digital wind direction. It calculates cross wind, head wind, and tail wind.

The WM-300 is a comprehensive instrument for agriculture, forestry, emergency management, and other industries.

The WM-350 gives environmental data specific to your location and includes a 48-hr history displayed in a bar graph or numerical listings.

SM-18 Skymate Wind Meter with Temperature and Wind Chill:

- Measures wind speed and temperature
- Displays current temperature, and current, maximum, and average wind speed
- Calculates wind chill

The SM-18 has a convenient pocket-knife design. Its accuracy and price make it a great value in a handheld unit.

SM-19 Skymate Plus with Relative Humidity, Dew Point, and Temperature:

- Measures wind speed, temperature, and relative humidity
- Displays current temperature, and current, maximum, and average wind speed
- Calculates wind chill and dew point

The SM-19 has all the wind features of the SM-18 plus an accurate hygrometer for relative humidity and dew point.

SM-28 Skymaster Wind/Weather Meter:

- Measures wind speed, temperature, relative humidity, and barometric pressure
- Displays current temperature, and current, maximum, and average wind speed
- Calculates wind chill, dew point, altitude, and heat index

The SM-28 Skymaster allows you to track weather in the palm of your hand!
