CM10K TRIPOD KIT MANUAL

The CM10K Tripod Kit can be used to assemble a 6 foot or 10 foot tripod equivalent to Campbell Scientific's preassembled CM6 and CM10 Tripods. The kit significantly reduces shipping weight and costs by providing only tripod parts that cannot be easily obtained from machine shops and retail hardware suppliers. The user is required to provide several lengths of threaded galvanized pipe to complete the assembly.

1. TRIPOD KIT ASSEMBLY

Figure 1-1 shows a fully assembled CM10 Tripod with the CM10 Guy Kit. The CM6 is shorter but similar in appearance and has no guy kit option. Figure 1-2 shows a view of a tripod indicating parts supplied by Campbell

Scientific (solid) and parts the user must supply (dashed). Numbered arrows correspond to item numbers in Tables 1-1, 1-2, and 1-3. Items in Table 1-1 are supplied in the CM10K Tripod Kit. Items in Tables 1-2 and 1-3 must be supplied by the user.
