

Installation and Maintenance Services

High-Quality Support for Trusted and Accurate Data

Campbell Scientific systems are designed to operate in the harshest of environments.

Installation, commissioning, and maintenance services delivered by our experienced engineers give you the extra reassurance that your systems are set up and then maintained to continue capturing outstandingly reliable data throughout the lifespan of your project.

Campbell Scientific installation and commissioning services ensure your measurement equipment is installed, set up, and configured correctly from the beginning, enabling seamless integration into established networks and immediate data capture. To be assured of continual, lifetime, trouble-free operation, we recommend regular maintenance for ongoing measurement accuracy.

Installation & Commissioning

- Pre-installation system testing and verification
- Option to add site survey to be performed before installation to aid in site selection and sensor placement
- Installation undertaken by experienced Campbell Scientific field service technician(s)
- Installation plans, risk assessments, and method statements created and shared ahead of any works
- Flexibility around your schedules and time constraints
- Post-installation system verification, training, and assistance with software setup and configuration
- Robust and documented testing to ensure systems meet defined requirements and required industry standards

Our Maintenance Offering

Routine maintenance ensures that your system will provide ongoing data quality and assurance, and reduces the total cost of ownership over the system's lifetime.

- **Scheduled routine maintenance ensures that**
 - Loggers, communications devices, sensors, and system infrastructure are in good condition.
 - Data are at the required frequency and accuracy.
- **Maintenance routines include**
 - Replacement of accessories with limited life spans.
 - On-site calibration or swap-out of sensors with calibrated units.

Other Services

Campbell Scientific provides a range of services to help you select, install, configure, and maintain the right solution for your unique application. To give you peace of mind throughout the length of your project, we complement product selection, system design, and configuration expertise with professional project management and life cycle services.

FAQ

How long does an installation take?

A standard weather station installation can be completed in a day. Our technicians are available to be on-site at your convenience. If it is going to take longer, we will let you know before the visit.

Can you provide training during the installation?

Campbell Scientific can provide on-site training, empowering your own personnel with the knowledge of your new data collection systems.

Do you offer multi-year maintenance contracts?

Campbell Scientific can offer flexible maintenance plans to meet your individual requirements.

How do I find out more?

Talk to our sales representatives who will provide you with a quote for our installation and maintenance services. If you would like to proceed, we will be in contact to arrange a suitable date for you.
