# Installation and Maintenance Services

for Automated Weather Observing Systems

**Campbell Scientific offers an installation and maintenance service for your Automated Weather Observing System (AWOS).**

Our installation and commissioning services ensure your measurement equipment is installed, set up, and configured correctly from the beginning, enabling seamless integration into current networks and immediate data collection.

Campbell Scientific equipment is famous for its ruggedness and reliability and often goes on collecting data long after an instrument's expected lifespan. To be assured of continual, lifetime, trouble-free operation, we recommend regular maintenance to ensure ongoing measurement accuracy.

## Installation & Commissioning

- Pre-installation system testing and verification
- Installation undertaken by experienced Campbell Scientific field service technician(s)
- A site survey performed before the installation to aid in site selection and sensor placement
- Installation plans, risk assessments, and method statements created and shared ahead of any works
- Flexibility around your schedules and time constraints
- Post-installation system verification, training, and assistance with software setup and configuration

# Our Maintenance Offering

Routine maintenance ensures that your system will provide ongoing data quality and assurance, and reduces the total cost of ownership over the system's lifetime.

- All equipment and sensors are in good condition and continue to perform to all relevant standards and report accurate data.
- Your system will provide ongoing data quality assurance, addressing any potential problems before they become issues and reducing total lifetime cost of ownership.
- The data logger and system battery are exchanged for new ones to ensure the system power continues until the next maintenance visit.

## Other Services

Campbell Scientific provides a range of services to help you select, install, configure, and maintain the right solution for your unique application. To give you peace of mind throughout the length of your project, we complement product selection, system design, and configuration expertise with professional project management and life cycle services.

## FAQ

### **How long does an installation take?**

A standard weather station installation can be completed in a day. Our technicians are available to be on-site at your convenience. If it is going to take longer, we will let you know before the visit.

### **Can you provide training during the installation?**

Campbell Scientific can provide on-site training, empowering your own personnel with the knowledge of your new data collection systems.

### **Do you offer multi-year maintenance contracts?**

Campbell Scientific can offer flexible maintenance plans to meet your individual requirements.

### **How do I find out more?**

Talk to our sales representatives who will provide you with a quote for our installation and maintenance services. If you would like to proceed, we will be in contact to arrange a suitable date for you.
