INSTALLATION AND MAINTENANCE SERVICES

FOR AUTOMATED WEATHER
OBSERVING SYSTEM

Campbell Scientific offer an Installation and Maintenance service for your Automated Weather Observing System. Campbell Scientific's installation and commissioning services ensure your measurement equipment is installed, set up, and configured correctly from the beginning, enabling seamless integration into current networks and immediate data collection.

Campbell Scientific equipment is famous for its ruggedness and reliability and often goes on collecting data long after an instrument's expected lifetime. To be assured of continual, lifetime, trouble-free operation, we recommend regular maintenance to ensure ongoing measurement accuracy.

Campbell Scientific Ltd Installation and commissioning offering:

- Pre installation system testing and verification
- Installation undertaken by experienced Campbell Scientific field service technician
- A site survey - performed before the installation to aid site selection and sensor placement
- Installation plans, risk assessments and method statements created and shared ahead of any works
- Flexibility around your schedules and time constraints
- Post installation system verification, training and assistance with software set up and configuration

Campbell Scientific Ltd Maintenance offering:

- All equipment and sensors are in good condition and continue to perform to all relevant standards and continue to report accurate data.
- Your system will provide ongoing data quality assurance, addressing any issues, before they become issues and reducing total lifetime cost of ownership.
- The datalogger and system battery are exchanged for new ones to ensure the system power continues until the next maintenance visit.

Other Services

Campbell Scientific provides a range of services to help you select, install, configure, and maintain the right solution for your unique application. To give you peace of mind throughout the length of your project, we complement product selection, system design, and configuration expertise with professional project management and life cycle services.

FAQ

How long does an Installation take?

A standard weather station Installation can be completed in a day. Our technicians generally arrive on site between 08:30 and 09:30AM and are usually finished by 4PM. If it is going to take longer, we will let you know before the visit.

Can you provide training during the Installation?

Campbell Scientific can provide on-site training to your personnel, empowering your own personnel with the knowledge of your new data collection systems.

Do you offer multi year Maintenance contracts?

Campbell Scientific can offer flexible maintenance plans to meet your requirements.

How do I start the process?

Talk to our Sales Representatives who will provide you with a quote for our Installation and Maintenance services. If you would like to proceed, we will be in contact to arrange a date suitable for yourselves.

Campbell

S C I E N T I F I C ®

As a trusted provider of measurement solutions since 1974, Campbell Scientific has delivered the information that helps mitigate severe weather casualties; aids scientists in gathering data to assist in the understanding of climate change and other human-made environmental impacts; and supports countless organizations, institutions, and national agencies in providing more efficient services to their people. Our instrumentation hardware is known to be the best in the business. Our software services provide an unrivaled level of insight. Our project delivery expertise combines both to deliver a unique end-to-end solution capable of changing the world.
