CAMPBELL SCIENTIFIC TRAINING COURSES

HANDS-ON TRAINING TO
EMPOWER YOUR SUCCESS.

Training courses are a great way to get to know your Campbell product. Whether you are a beginner or a more advanced user, our training courses offer something for everyone. Our courses are designed to enable you to get the most out of your Campbell product, helping you understand and apply the core concepts relating to programming and communicating to and from sensors and systems with a Campbell datalogger. Combining theoretical discussion with practical hands on programming, you will be able to apply your new-found skills in real world scenarios, in the safety of a classroom.

Why choose a Campbell Course?

Acquire transferable skills needed in the data acquisition industry

Measurement concepts are universal, and Campbell equipment is widely used around the world across academia, industry and research.

Our personalised course instruction makes these powerful systems easier to understand and more accessible - allowing you to make the most of your monitoring equipment.

Help staff manage existing networks

For employers, the more people who know how to use new and existing equipment, the better. Spread the knowledge across core staff to widen the knowledge pool and create better solutions.

For employees, increased confidence in using the equipment leads to better results in the field - more effective troubleshooting, more accurate data acquisition, and ultimately better data.

What People Have To Say:

“ I learned lots about methods of communication that I wasn't expecting. The trainer was very knowledgeable and had a clear and approachable teaching method. Great. ”

“ The training room and facilities provided were excellent. The trainer was a first class specialist for sure. ”

“ The trainer was the best I have ever met. We got more than expected from Campbell. Thank you very much for the course and hospitality. ”

“ It was extremely useful to get hands-on experience with a variety of instruments and learn how to use them with the logger. ”

Campbell

S C I E N T I F I C ®

As a trusted provider of measurement solutions since 1974, Campbell Scientific has delivered the information that helps mitigate severe weather casualties; aids scientists in gathering data to assist in the understanding of climate change and other human-made environmental impacts; and supports countless organizations, institutions, and national agencies in providing more efficient services to their people. Our instrumentation hardware is known to be the best in the business. Our software services provide an unrivaled level of insight. Our project delivery expertise combines both to deliver a unique end-to-end solution capable of changing the world.
