Overview
The AM25T 25-Channel Solid State Multiplexer increases the number of thermocouples that can be measured by a Campbell Scientific datalogger. The multiplexer interfaces with the datalogger and adds terminals for wiring additional thermocouples or other low-level voltage output sensors.

Benefits and Features
- Greatly increases the number of thermocouples a datalogger can measure
- Multiplexes up to 25 thermocouples
- Includes an on-board PRT that serves as a reference junction
- Allows several AM25Ts to be controlled by one datalogger increasing the number of thermocouples that can be measured
- Uses a metallic, internal ground plane to reduce thermal gradients, which ensures more accurate measurements
- Provides a vertical package for a smaller “footprint” that makes it easier to fit in a crowded enclosure
- Supports a maximum cable length of 500 feet when lightning protection is used

Technical Description
Up to 25 thermocouples are sequentially connected to a common differential channel on the AM25T. The output from this channel is wired to a differential input channel on the datalogger. As the AM25T sequentially changes channels, the datalogger measures the output from each thermocouple in sequence.

A PRT attached to the AM25T’s grounding bar provides a temperature reference for the thermocouple measurements. The heat capacity of the grounding bar and an insulated aluminum cover reduce thermal gradients along the length of the multiplexer. Reducing the thermal gradients allow more accurate measurements.

Specifications
Expandability
- Assumes sequential activation of multiplexers and that each datalogger channel is uniquely dedicated.
- 2 AM25Ts per CR800 or CR850
- 4 AM25Ts per CR1000, CR3000, or CR10(X)
- 6 AM25Ts per CR23X or 21X

### Internal PRT Accuracy
- ±0.2°C (-25° to +50°C)
- ±0.4°C (-40° to +85°C)

### Power
- 9.6 to 16 Vdc (under load), unregulated 12 Vdc nominal

### Typical Relay Resistance
- 500 Ω

### Maximum Switching Current
- 25 mA (Switching currents greater than 25 mA will damage the relays and render them unusable.)

### CE Compliance
- Conforms to EN55022-1:1995 and EN50082-1:1992.

### Operating Temperature Range
- -40° to +85°C

### Operating Humidity Range
- 0 to 95% (non-condensing)

### Dimensions
- 23.6 x 5.10 x 13.2 cm (9.3 x 2 x 5.2 in.)

### Weight
- 0.91 kg (2.0 lb)

### Typical Current Drain
