

# Data Graphics and Analysis Software

For data display

Ready for any Application

These software packages are designed to display data retrieved from Campbell Scientific dataloggers. The data is displayed in graphical

formats such as strip charts, dials, scatter plots, and meters, as well as digital values. Several of these packages also include alarms.

## MAJOR SPECIFICATIONS

		Purchased Separately	Design Goal	Real-Time Updates	Alarms	Designer Tool Kit
<b>View Pro</b>   Graphical and Tabular Data Display		no (included in PC200W, PC400, LoggerNet and RTDAQ)	graphically appealing, flexible, powerful	no (historic only)	none	tables, graphs with multiple traces, FFTs, histograms
<b>QuickReports</b>   Graphical and Tabular Data Display		no (included in LNDB)	simple report generator using an LNDB database	no (historic only)	none	tables, graphs with multiple traces
<b>RTMC</b>   Real-Time Monitoring and Control Software		no (included in RTDAQ, LoggerNet, LoggerNet Admin, LoggerNetData)	starter software, simple, yet graphically appealing	yes	real-time, visual, audible	alarms, COM check, gauges, charts, images, labels, digital displays, set points, sliders, status bars, table displays, time displays, switches
<b>RTMC Pro</b>   Real-Time Monitoring and Control Software, Professional		yes (as an enhancement to RTMC)	graphically appealing, flexible, powerful	yes	real-time, visual, audible, multilevel alarms possible, alarm log, launch programs, email notifications	all the tools included in RTMC, as well as additional alarm types, switches, layout components, hot spots launch commands, FTP file transfer, run cora commands, xy chart, oscilloscopes
