

microSD Cards

Industrial-rated memory cards for environmental and industrial applications

When your data storage application calls for ruggedized and reliable flash memory, but space is extremely limited, our microSD cards deliver the capacity you need in a tiny form factor. We offer the broadest range of industrial-grade cards available, including advancedMLC (aMLC) and single-level cell (SLC) cards. These types of cards are highly recommended for industrial, military, and medical data storage applications because they have greater endurance, faster read/write speeds, lower power consumption, and wider temperature ranges.

		Storage Capacity	Memory Type	Operating Temperature Range
<p>38476 16 GB microSD Flash aMLC Memory Card</p> <p>Popular</p> 		16 GB	advanced multi-level cell (aMLC)	-25° to +85°C
<p>27158 2 GB microSD Flash SLC Memory Card</p> <p>Popular</p> 		2 GB	single-level cell (SLC)	-40° to +85°C
<p>33288 8 GB microSD Flash SLC Memory Card</p> <p>Popular</p> 		8 GB	single-level cell (SLC)	-40° to +85°C
