CSI LoggerNet Training Course Information

Dates: November 13 - 16, 2001

Campbell Scientific offers a four-day training course that covers the operation and programming of the CR10X-TD datalogger and the use of LoggerNet Datalogger Support Software. This is a comprehensive, introductory level course with an emphasis on programming and datalogger network configuration (see outline below). "Hands-on" programming exercises and course handouts are used to reinforce the concepts covered by the instructor.

Experienced CSI applications engineers teach the course. Class size is limited to ten attendees to ensure personalized instruction and assistance. Attendees must be familiar with using a personal computer.

Course fees are \$650.00 per person, which includes a training manual, and the use of a CR10X-TD datalogger, computer and sensors. Lunch will be provided all four days, and there will be a tour of Campbell Scientific's facilities on the last day.

Course Registration

Courses are filled on a first-come basis. To register, call Sid Stock at (435) 750-9581 or Mary Lou Gittins at (435) 750-9556 to confirm availability, then fax a copy of the registration form to (435) 750-9540. A copy of the registration form with "RECEIVED" stamped on it will be faxed to you that confirms registration. **You are not registered until you have received the faxed confirmation.** Mail a copy of the registration form with payment to the address indicated on the registration form.

You will be responsible for travel expenses including airfare, hotel and meal expenses outside the training.
