FOR IMMEDIATE RELEASE

### **Campbell Scientific's Strategic Investment**

LOGAN, Utah (December 28, 2005) – In December 2004, Campbell Scientific, Inc., made a strategic investment in ARIBEX, Inc., the developer of the NOMAD™, the world's first hand-held, battery-powered X-ray system for intra-oral imaging. The investment will be important in final development and product commercialization of NOMAD™.

According to Paul Campbell, President and CEO of Campbell Scientific, "NOMAD is well-designed and addresses important issues in office as well as field-based dental care. We anticipate that ARIBEX technology will have a very positive reception, and will benefit from the combination of Campbell Scientific's background of portable instruments and ARIBEX's background of X-ray technology."

Dr. Clark Turner, President and CEO of ARIBEX, Inc., states, "ARIBA X-Ray (currently known as ARIBEX, Inc.) greatly benefits from the investment of Campbell Scientific and the resulting association with a well-established, global company."

ARIBEX, Inc., formerly known as ARIBA X-Ray is a forward-moving company researching and developing instrumentation for the X-ray radiography fields. For further information about ARIBEX, Inc., please visit their website, [www.aribex.com](http://www.aribex.com).

Campbell Scientific, Inc., is a worldwide manufacturer of dataloggers, data acquisition systems, and measurement and control products. Campbell Scientific's mission is to satisfy the instrumentation needs of their customers by providing versatile and reliable products that can withstand harsh, remote environments. To learn more about Campbell Scientific, Inc., or to ask questions of the company's highly trained technical and sales support team, please visit [www.campbellsci.com](http://www.campbellsci.com).
