CampbellCloud™

Your Data. Anywhere. Anytime.

The Future of Environmental Monitoring at Your Fingertips

Monitor | Analyze | Respond

How do you get real-time access to your environmental data, manage your monitoring stations remotely, stay alerted to critical changes, and do it all securely—from anywhere in the world?

With CampbellCloud™, you gain a secure, powerful, and scalable platform to manage your environmental monitoring networks in real time—delivering insights when and where you need them.

Remotely Access and Manage Your Networks

Whether you operate a single station or an expansive sensor network, CampbellCloud gives you full control from anywhere. Configure, view, and manage all your data in real time through a single intuitive interface—no field visits required.

Custom Dashboards and Data Displays

Get straight to what matters. Build dashboards that highlight your key parameters and visualize data in formats that make sense for your operations—graphs, tables, gauges, and more. Make managing your network simple and intuitive.

Automated Alerts for the Thresholds that Matter

Receive automated alerts and warnings when your thresholds are met—by email or through the platform. Stay ahead of changing conditions with customizable monitoring that's as proactive as you are, and ensure people and property stay safe when conditions change.

Real-Time and Historical Insights

Whether you're observing trends or checking today's measurements, CampbellCloud provides instant access to both real-time and historical data—allowing you to analyze, report, and act with confidence.

Scalable from One Station to Hundreds

From small projects to large-scale networks, CampbellCloud is designed to grow with you. Easily expand your system as your needs evolve, without reengineering your entire setup.

A Secure, Cloud-Hosted Solution

CampbellCloud is built on robust, high-security infrastructure, ensuring your data is protected and always available. CampbellCloud is hosted in the cloud, giving you anytime, anywhere access without the need for expensive on-premises servers.

What Makes CampbellCloud Great

Seamless Integration: Connect directly with your systems powered by Campbell Scientific with minimal configuration. Compatible with all modern Campbell Scientific data loggers so that your data can be visible in minutes.

Zero Maintenance: No local servers, software installs, or IT teams required—just log in and view and manage your data anywhere, anytime.

Tailored User Experience: Create custom dashboards and alerts to match your needs, ensuring that the right data are in front of the right people.
