

## EasyFlux WebH

EasyFlux Web Software, Campbell Scientific-Hosted

## Fully Corrected Fluxes

Campbell Scientific-hosted software tool that monitors fully corrected fluxes of CO<sub>2</sub>, latent and sensible heat, and momentum

### Overview

EasyFlux<sup>®</sup> Web CSI-Hosted is a web-based software tool for monitoring any Campbell Scientific data-logger-based system. EasyFlux<sup>®</sup> Web CSI-Hosted is hosted on Campbell Scientific's own Microsoft Azure server, which allows for automatic updates and maintenance of the software. After users create an account, they are given their own IP address to allow them to easily connect to their data from an Internet-connected device. Monitoring a network of data loggers is made easy with real-time data monitoring, customizable alerts, and data

download capabilities. EasyFlux<sup>®</sup> Web is compatible with all Campbell Scientific data-logger-based systems, including flux, weather, and soil stations.

### Updates in Version 2.01

The updated EasyFlux<sup>®</sup> Web 2.01 includes new benefits and features to enhance the user experience. EasyFlux<sup>®</sup> Web 2.01 now provides the ability to monitor live video cameras.

### Benefits and Features

- › Custom alerts with email notification
- › Monitor flux instruments and energy-balance sensors to plan site visits more effectively
- › Quickly reference metadata for each station
- › Remotely download data
- › Map view of all stations in network with quick view of critical data and alerts available on PC, tablet, or smartphone device
- › Flexible product offering with ability to purchase a local copy or a subscription cloud-based plan
- › Administrator choices on read/write abilities of users
- › Field camera integration
- › Import old data files
- › Translation Utility to view EasyFlux<sup>®</sup> Web in language of choice
- › Fully compatible with EasyFlux<sup>®</sup> DL series
- › Automatic software updates
- › No install required
- › Live video camera monitoring

### Detailed Description

EasyFlux<sup>®</sup> Web is a web-based multi-user software system used

for monitoring Internet-connected Campbell Scientific eddy-

covariance stations. EasyFlux<sup>®</sup> Web functions with a Campbell Scientific data logger running the EasyFlux<sup>®</sup> DL program.

After adding your stations, you can graphically monitor data including QA/QC values, download data, compare data between stations, and set up alerts to notify you by email of data values outside of user-entered thresholds.

An administrator can set up user accounts and control the permissions of each user.

There are two installation options for EasyFlux<sup>®</sup> Web:

1. **EasyFlux<sup>®</sup> Web Campbell Scientific, Inc.-Hosted:** Campbell Scientific can install the software and automatically update it for you in an Azure-based environment, as well as provide you with a link to access the software.
2. **EasyFlux<sup>®</sup> Web Self-Hosted:** You can install the software directly on your server. When installing the software on your server, the installation process will also install SQL Server Express. EasyFlux<sup>®</sup> Web is then accessed by typing the IP address of the server into a web browser.
