Overview

Current Version: 2.1

The PC-OPC Server uses the OPC standard interface to allow third-party, OPC-compatible graphics packages to view data from the LoggerNet server. This software provides a simple browser interface that allows you to easily select the values you want to display. It also allows you to view input locations, final storage data, and LoggerNet communications server statistics, as well as perform control operations.

Benefits and Features

- Demo version available for download

Detailed Description

The PC-OPC Server uses a simple browse interface that:

- Provides data via “data tags” to any SCADA or third-party software that supports OPC
- Updates, or pushes, data to third-party software as the LoggerNet server collects it from the data logger(s)
- Allows third-party software to set input locations, variables, ports, and flags in our data loggers

Many software and hardware products support OPC. Products that have been tested by Campbell Scientific include Iconics Genesis, Intellution IFIX, and National Instruments Lookout.

A PC-OPC trial version can be downloaded at no charge. The trial version generates random data instead of retrieving the data.

License for Use

This software is protected by United States copyright law and international copyright treaty provisions. Installation of this software constitutes an agreement to abide by the provisions of its licensing agreement. Campbell Scientific grants you a non-exclusive license to use this software in accordance with the following:

1. The purchase of the single license allows you to install and use a single instance of the software on one physical computer or one virtual machine only.

2. This software cannot be loaded on a network server for the purposes of distribution or for access to the software by multiple operators. If the software can be used from any computer other than the computer on

For comprehensive details, visit: www.campbellsci.com/pc-opc
which it is installed, you must license a copy of the software for each additional computer from which the software may be accessed.

3. If this copy of the software is an upgrade from a previous version, you must possess a valid license for the earlier version of software. You may continue to use the earlier copy of software only if the upgrade copy and earlier version are installed and used on the same computer. The earlier version of software may not be installed and used on a separate computer or transferred to another party.

4. This software package is licensed as a single product. Its component parts may not be separated for use on more than one computer.

5. You may make one (1) backup copy of this software onto media similar to the original distribution, to protect your investment in the software in case of damage or loss. This backup copy can be used only to replace an unusable copy of the original installation media.

This software may not be sold, included, or redistributed in any other software or altered in any way without prior written permission from Campbell Scientific. All copyright notices and labeling must be left intact.
