# CR1000Xe
Measurement and Control Datalogger

Flagship Data Logger
Accurate, Rugged, Reliable

Overview

The CR1000Xe is our flagship data logger that provides measurement and control for a wide variety of applications. Its reliability and ruggedness make it an excellent choice for remote environmental applications, including weather stations, mesonet systems, wind profiling, air quality monitoring, hydrological systems, water quality monitoring, and hydrometeorological stations. The CR1000Xe is a low-powered device that measures sensors; drives direct communications and telecommunications; analyzes data; controls external devices; and stores data and programs in onboard, non-volatile storage. The electronics are RF-shielded by a unique, sealed, stainless-steel canister. A battery-backed clock assures accurate timekeeping. The onboard, BASIC-like programming language—common to all Campbell Scientific data loggers—supports data processing and analysis routines.
