

## TE525WS-L

Rain Gage with 8 in. Orifice

## Conforms to National Weather Service Recommendation

### Overview

The TE525WS, manufactured by Texas Electronics, is a tipping bucket rain gage that conforms to the National Weather Service recommendation for an 8 in. funnel orifice. It measures

rainfall in 0.01 in. increments. This tipping bucket is compatible with all Campbell Scientific data loggers, and it is widely used in environmental monitoring applications.

### Benefits and Features

- › Compatible with most Campbell Scientific data loggers
- › Accuracy is  $\pm 1$  percent at rates up to 1 in./hr
- › High precision—tips at 0.01-in. increments
- › Directly compatible with the CS705 Snowfall Adapter allowing the TE525WS to measure the water content of snow
- › Conforms to the National Weather Service recommendation for an 8-inch funnel orifice
- › Compatible with the CWS900-series interfaces, allowing it to be used in a wireless sensor network

### Detailed Description

The TE525WS funnels precipitation into a bucket mechanism that tips when filled to its calibrated level. A magnet attached to the tipping mechanism actuates a switch as the bucket tips.

The momentary switch closure is counted by the pulse-counting circuitry of our data loggers.
